Description

ABOUT

Take control of your life

Galaxy Command is an online application created for the user to take command of their busy life. It does this by keeping track and organizing clients, projects, and tasks. The user can create multiple projects, tasks, and even clients. Clients can be associated with projects; helping with prioritizing projects and tasks.

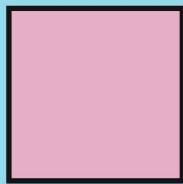

Target Audience

Galaxy Command can be used and be useful for anyone, especially those who have frequent deadlines and clients. The average user is between 20 to 50 years of age.

Once heard a wise man say there are no perfect men. Only perfect intentions.
Let me tell you something my friend. hope is a dangerous thing. Hope can drive
a man insane. Well, what is it today? more spelunking? Rehabilitated?
Well, now let me see. You know, i don't have any idea what that means.

A screenshot of a web browser window titled "creativeBrief_proj.png". The page displays a list of projects under a "Search Projects" input field. The projects are listed in colored buttons: red (Yeti Website), green (Bridgewater ...), blue (Two Tea), and yellow (Cuidado). A "Add Project" button is also visible. To the right of the projects, there are three preview cards for "Yeti Website", "Bridgewater", and "Two Tea", each showing a snippet of content and a "View" button. A large teal circle highlights the project list area with the text "Create and remove projects easily".
